... \ Interfaces \ IPropertyManagerPage2Handler9

IPropertyManagerPage2Handler9 Interface

Must be implemented by the add-in application to handle callbacks from [IPropertyManagerPage2](#).

.NET Syntax

Visual Basic (Declaration)

```
Public Interface IPropertyManagerPage2Handler9
```

Visual Basic (Usage)

```
Dim instance As IPropertyManagerPage2Handler9
```

C#

```
public interface IPropertyManagerPage2Handler9
```

C++/CLI

```
public interface class IPropertyManagerPage2Handler9
```

Example

To create a SOLIDWORKS .NET add-in that implements this interface , open in Visual Studio one of these projects:

Visual Basic - SwVBAddin
Visual C# - SwCSharpAddin

Example

[Create PropertyManager Page \(VBA\)](#)

Remarks

To use this interface :

In a SOLIDWORKS VBA macro, you must reference the **SOLIDWORKS exposed type libraries for add-in use** type library specific to the [version of SOLIDWORKS](#) that you are running.
In a SOLIDWORKS VB.NET or C# add-in, you must reference the **SOLIDWORKS.interop.swpublished** assembly and set [ComVisibleAttribute](#) to true (see [ComVisibleAttribute in VB.NET or C# Macros and Add-ins](#)).

For all unimplemented methods of this object, the add-in application can return E_NOTIMPL.
