

SOLIDWORKS API (NET VBA C#) — Reference (46/337): IComment- IComplexCornerTreatmentFeatureData

SOLIDWORKS API Documentation (converted from CHM)

IComment (Type)

IComment Interface

[See Also](#) [Members](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) : IComment Interface

Allows access to the comments in the Comment folder in the FeatureManager design tree.
NOTE: Click the **Members** link, located near the top of the topic, to see this interface's methods and properties.

.NET Syntax

Visual Basic (Declaration)

```
Public Interface IComment
```

Visual Basic (Usage)

```
Dim instance As IComment
```

C#

```
public interface IComment
```

C++/CLI

```
public interface class IComment
```

Visual Basic for Applications (VBA) Syntax

See [Comment](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

Remarks

To...		Then use...	Remark
Get comments		ICommentFolder::GetComments, which returns an array of comments ISelectionMgr::GetSelectedObject6, which returns a single comment	
Add comments		ICommentFolder::AddComment IFeature::AddComment IModelDocExtension::AddComment	

Accessors

[ICommentFolder::AddComment](#)
[ICommentFolder::GetComments](#) and [ICommentFolder::IGetComments](#)
[IFeature::AddComment](#)
[IModelDocExtension::AddComment](#)

Access Diagram

Delete Method (IComment)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComment Interface](#) : Delete Method (IComment)

Deletes a comment.

.NET Syntax

Visual Basic (Declaration)

```
Function Delete() As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As IComment  
Dim value As System.Boolean
```

```
value = instance.Delete()
```

C#

```
System.bool Delete()
```

C++/CLI

```
System.bool Delete();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

True if the comment is deleted, false if not

Visual Basic for Applications (VBA) Syntax

See [Comment.Delete](#).

Remarks

The comment to delete must not be selected in the FeatureManager design tree. Use [IModelDoc2::ClearSelection2](#) to ensure that the comment is not currently selected.

You must rebuild the FeatureManager design tree after deleting the comment. Use [IFeatureManager::UpdateFeatureTree](#) to perform this action.

SOLIDWORKS API Help

[Send comments](#) on this topic.

FeatureOwner Property (IComment)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComment Interface](#) : FeatureOwner Property (IComment)

Gets the feature that owns this comment.

.NET Syntax

Visual Basic (Declaration)

```
ReadOnly Property FeatureOwner As Feature
```

Visual Basic (Usage)

```
Dim instance As IComment  
Dim value As Feature  
  
value = instance.FeatureOwner
```

C#

```
Feature FeatureOwner {get;}
```

C++/CLI

```
property Feature^ FeatureOwner {  
    Feature^ get();  
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Pointer to the [IFeature](#) object that owns this comment

Visual Basic for Applications (VBA) Syntax

See [Comment::FeatureOwner](#).

Remarks

If the comment is not owned by a feature, then NULL is returned.

Because you cannot set the name of comment owned by a feature, use this property before using [IComment::Name](#) to determine if the comment is owned by a feature.

Name Property (IComment)

[See Also](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComment Interface](#) : Name Property (IComment)

Gets or sets the name of the comment as it appears in the FeatureManager design tree.

.NET Syntax

Visual Basic (Declaration)

```
Property Name As System.String
```

```
Dim instance As IComment
Dim value As System.String

instance.Name = value

value = instance.Name
```

C#

```
System.string Name {get; set;}
```

C++/CLI

```
property System.String^ Name {
    System.String^ get();
    void set ( & System.String^ value);
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Name of the comment as it appears in the FeatureManager design tree

Visual Basic for Applications (VBA) Syntax

See [Comment::Name](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

Remarks

You cannot set this property if the comment is owned by a feature because the name of the comment always matches the name of the feature that owns it. To determine if a comment is owned by a feature, use [IComment::FeatureOwner](#).

You must rebuild the FeatureManager design tree after setting the name of a comment. Use [IFeatureManager::UpdateFeatureTree](#) to perform this action.

Text Property (IComment)

[See Also](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComment Interface](#) : Text Property (IComment)

Gets or sets the text for the comment.

.NET Syntax

Visual Basic (Declaration)

```
Property Text As System.String
```

Visual Basic (Usage)

```
Dim instance As IComment  
Dim value As System.String
```

```
instance.Text = value
```

```
value = instance.Text
```

C#

```
System.string Text {get; set;}
```

C++/CLI

```
property System.String^ Text {  
    System.String^ get();  
    void set ( &    System.String^ value);  
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Text for the comment

Visual Basic for Applications (VBA) Syntax

See [Comment::Text](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

See Also

ICommentFolder (Type)

ICommentFolder Interface

[See Also](#) [Members](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) : ICommentFolder Interface

Allows access to the Comment folder in the FeatureManager design tree.

NOTE: Click the **Members** link, located near the top of the topic, to see this interface's methods and properties.

.NET Syntax

Visual Basic (Declaration)

```
Public Interface ICommentFolder
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder
```

C#

```
public interface ICommentFolder
```

C++/CLI

```
public interface class ICommentFolder
```

Visual Basic for Applications (VBA) Syntax

See [CommentFolder](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

Remarks

To...	Then use...
Get comments	ICommentFolder::GetComments, which returns an array of comments ISelectionMgr::GetSelectedObject6, which returns a single comment
Add comments	ICommentFolder::AddComment IFeature::AddComment IModelDocExtension::AddComment

Accessors

[IComment Interface](#)

AddComment Method (ICommentFolder)

[See Also](#) [Example](#)

 

[SolidWorks.Interop.sldworks Namespace](#) > [ICommentFolder Interface](#) : AddComment Method (ICommentFolder)

Adds a comment to this folder.

.NET Syntax

Visual Basic (Declaration)

```
Function AddComment( _  
    ByVal Text As System.String _  
) As Comment
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder  
Dim Text As System.String  
Dim value As Comment  
  
value = instance.AddComment(Text)
```

C#

```
Comment AddComment(  
    System.string Text  
)
```

C++/CLI

```
Comment^ AddComment(  
& System.String^ Text  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

Text
Comment to add to this folder

Return Value

Pointer to the [IComment](#) object

Visual Basic for Applications (VBA) Syntax

See [CommentFolder::AddComment](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

Remarks

To see this comment, use [IFeatureManager::UpdateFeatureTree](#) to rebuild the FeatureManager design tree.

[Send comments on this topic.](#)

GetCommentCount Method (ICommentFolder)

[See Also](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) > [ICommentFolder Interface](#) : GetCommentCount Method (ICommentFolder)

Gets the number of comments in this folder.

.NET Syntax

Visual Basic (Declaration)

```
Function GetCommentCount() As System.Integer
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder
Dim value As System.Integer

value = instance.GetCommentCount()
```

C#

```
System.int GetCommentCount()
```

C++/CLI

```
System.int GetCommentCount();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

Number of comments in the folder

Visual Basic for Applications (VBA) Syntax

See [CommentFolder::GetCommentCount](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

Remarks

Call this method before calling [ICommentFolder::IGetComments](#) to determine the size of the array for that method.

GetComments Method (ICommentFolder)

[See Also](#) [Example](#)

[SolidWorks.Interop.sldworks Namespace](#) > [ICommentFolder Interface](#) : GetComments Method (ICommentFolder)

Gets all of the comments in this folder.

.NET Syntax

Visual Basic (Declaration)

```
Function GetComments() As System.Object
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder
Dim value As System.Object

value = instance.GetComments()
```

C#

```
System.Object GetComments()
```

C++/CLI

```
System.Object^ GetComments();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

Array of all of the comments in the folder

Visual Basic for Applications (VBA) Syntax

See [CommentFolder::GetComments](#).

Example

[Get Comments in Comments Folder \(C#\)](#)
[Get Comments in Comments Folder \(VB.NET\)](#)
[Get Comments in Comments Folder \(VBA\)](#)

GetFeature Method (ICommentFolder)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [ICommentFolder Interface](#) : GetFeature Method (ICommentFolder)

Gets the feature for this folder.

.NET Syntax

Visual Basic (Declaration)

```
Function GetFeature() As Feature
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder  
Dim value As Feature
```

```
value = instance.GetFeature()
```

C#

```
Feature GetFeature()
```

C++/CLI

```
Feature^ GetFeature();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

Pointer to the [IFeature](#) object

Visual Basic for Applications (VBA) Syntax

See [CommentFolder::GetFeature](#).

IGetComments Method (ICommentFolder)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [ICommentFolder Interface](#) : IGetComments Method (ICommentFolder)

Gets all of the comments in this folder.

.NET Syntax

Visual Basic (Declaration)

```
Function IGetComments( _  
    ByVal Count As System.Integer _  
) As Comment
```

Visual Basic (Usage)

```
Dim instance As ICommentFolder  
Dim Count As System.Integer  
Dim value As Comment  
  
value = instance.IGetComments(Count)
```

C#

```
Comment IGetComments(  
    System.int Count  
)
```

C++/CLI

```
Comment^ IGetComments(  
&    System.int Count  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

Count
Number of comments in the folder

Return Value

- in-process, unmanaged C++: Pointer to an array of [IComment](#) objects
 - VBA, VB.NET, C#, and C++/CLI: Not supported
- See [In-process Methods](#) for details about this type of method.

Example

Before calling this method, call [ICommentFolder::GetCommentCount](#) before to determine the size of the array.

[ICommentFolder::GetComments Method](#)

ICornerTreatmentFeatureData (Type)

SOLIDWORKS API Help

[Send comments on this topic.](#)

ICornerTreatmentFeatureData Interface

[See Also](#) [Members](#)

[SolidWorks.Interop.sldworks Namespace](#) : ICornerTreatmentFeatureData Interface

Allows access to a complex corner treatment feature of a structure system.

NOTE: Click the **Members** link, located near the top of the topic, to see this interface's methods and properties.

.NET Syntax

Visual Basic (Declaration)

```
Public Interface ICornerTreatmentFeatureData
```

Visual Basic (Usage)

```
Dim instance As ICornerTreatmentFeatureData
```

C#

```
public interface ICornerTreatmentFeatureData
```

C++/CLI

```
public interface class ICornerTreatmentFeatureData
```

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData](#).

Example

See the [ICornerManagementFolder](#) examples.

Remarks

This interface is:

- derived from [ICornerTreatmentFeatureData](#).
- valid only if [ICornerTreatmentFeatureData.IgnoreCornerTreatment](#) is false.

A complex corner is the position in a structure system where three or more members intersect.

In the SOLIDWORKS Design user interface, the Complex Corner PropertyManager contains five lists that you can manage using the APIs in this interface and elsewhere:

- [Corner groups](#)
- [Trim tool](#) member
- [Body trim](#) members
- [Planar trim](#) members
- [User defined trim](#) faces

You can assign one member as a trim tool and use it to add or remove material from adjacent members. Other members are trimmed based on their designated trim orders and positions with respect to touching members.

For more information, see:

- SOLIDWORKS Design user-interface help > Weldments and Structure System > Structure System > Corner Management > Trimming Complex Corners
- SOLIDWORKS Design user-interface help > Weldments and Structure System > Structure System > Corner Management > Examples of Complex Corner Management
- SOLIDWORKS Design user-interface help > Weldments and Structure System > Structure System > Complex Corner PropertyManager

Accessors

Cast an [ICornerTreatmentFeatureData](#) object to this interface.

GetBodyTrimMembers Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : GetBodyTrimMembers Method (IComplexCornerTreatmentFeatureData)

Gets the body trim members of this complex corner treatment feature.

Visual Basic Syntax

Visual Basic (Declaration)

```
Function GetBodyTrimMembers() As System.Object
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim value As System.Object  
  
value = instance.GetBodyTrimMembers()
```

C#

```
System.object GetBodyTrimMembers()
```

C++/CLI

```
System.Object^ GetBodyTrimMembers();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

Array of body trim [IStructureSystemMemberFeatureData](#)s

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::GetBodyTrimMembers](#).

Example

See the [ICornerManagementFolder](#) examples.

GetPlanarTrimMembers Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : GetPlanarTrimMembers Method (IComplexCornerTreatmentFeatureData)

Gets the planar trim member of this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Function GetPlanarTrimMembers() As System.Object
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim value As System.Object  
  
value = instance.GetPlanarTrimMembers()
```

C#

```
System.object GetPlanarTrimMembers()
```

C++/CLI

```
System.Object^ GetPlanarTrimMembers();
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Return Value

Array of planar trim [IStructureSystemMemberFeatureData](#)s

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData.GetPlanarTrimMembers](#).

Example

See the [ICornerManagementFolder](#) examples.

GetTrimToolMember Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : GetTrimToolMember Method (IComplexCornerTreatmentFeatureData)

Gets the specified trim tool member for this complex corner treatment.

Visual Basic Syntax

Visual Basic (Declaration)

```
Function GetTrimToolMember( _  
    ByRef MemberObjType As System.Integer _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim MemberObjType As System.Integer  
Dim value As System.Object  
  
value = instance.GetTrimToolMember(MemberObjType)
```

C#

```
System.object GetTrimToolMember(  
    out System.int MemberObjType  
)
```

C++/CLI

```
System.Object^ GetTrimToolMember(  
& [Out] System.int MemberObjType  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

MemberObjType

Trim tool member object to return as defined by [swTrimToolMemberObjectType_e](#)

Return Value

[ICornerMember](#) or [IFeature](#)

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::GetTrimToolMember](#).

Example

See the [ICornerManagementFolder](#) examples.

PlanarTrimOption Property (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : PlanarTrimOption Property (IComplexCornerTreatmentFeatureData)

Gets and sets the planar trim option for this complex corner treatment feature.

Visual Basic Syntax

Visual Basic (Declaration)

Property PlanarTrimOption As System.Integer

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData
Dim value As System.Integer

instance.PlanarTrimOption = value

value = instance.PlanarTrimOption
```

C#

```
System.int PlanarTrimOption {get; set;}
```

C++/CLI

```
property System.int PlanarTrimOption {
    System.int get();
    void set ( & System.int value);
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Planar trim option as defined by [swCornerTreatmentPlanarTrimOptions_e](#)

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::PlanarTrimOption](#).

Example

See the [ICornerManagementFolder](#) examples.

Remarks

This property is valid only if [IComplexCornerTreatmentFeatureData::PlanarTrimToolType](#) is set to [swCornerTreatmentPlanarTrimToolType_e.swAutomatic](#).

PlanarTrimToolType Property (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : PlanarTrimToolType Property (IComplexCornerTreatmentFeatureData)

Gets and sets the planar trim tool type for this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Property PlanarTrimToolType As System.Integer
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData
Dim value As System.Integer
```

```
instance.PlanarTrimToolType = value  
value = instance.PlanarTrimToolType
```

C#

```
System.int PlanarTrimToolType {get; set;}
```

C++/CLI

```
property System.int PlanarTrimToolType {  
    System.int get();  
    void set ( & System.int value);  
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Planar trim tool type as defined by [swCornerTreatmentPlanarTrimToolType_e](#)

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::PlanarTrimToolType](#).

Example

See the [ICornerManagementFolder](#) examples.

SetBodyTrimMembers Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : SetBodyTrimMembers Method (IComplexCornerTreatmentFeatureData)

Sets the body trim members of this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Function SetBodyTrimMembers( _  
    ByVal BodyMemList As System.Object _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim BodyMemList As System.Object  
Dim value As System.Boolean  
  
value = instance.SetBodyTrimMembers(BodyMemList)
```

C#

```
System.bool SetBodyTrimMembers(  
    System.object BodyMemList  
)
```

C++/CLI

```
System.bool SetBodyTrimMembers(  
& System.Object^ BodyMemList  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

BodyMemList
Array of body trim [IStructureSystemMemberFeatureData](#)s

Return Value

True if body trim members successfully set, false if not

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::SetBodyTrimMembers](#).

SetPlanarTrimMembers Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : SetPlanarTrimMembers Method (IComplexCornerTreatmentFeatureData)

Sets the planar trim member of this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Function SetPlanarTrimMembers( _  
    ByVal PlanarMemList As System.Object _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim PlanarMemList As System.Object  
Dim value As System.Boolean  
  
value = instance.SetPlanarTrimMembers(PlanarMemList)
```

C#

```
System.bool SetPlanarTrimMembers(  
    System.object PlanarMemList  
)
```

C++/CLI

```
System.bool SetPlanarTrimMembers(  
& System.Object^ PlanarMemList  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

PlanarMemList
Array of planar trim [IStructureSystemMemberFeatureData](#)s

Return Value

True if planar trim members successfully set, false if not

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::SetPlanarTrimMembers](#).

SetTrimToolMember Method (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : SetTrimToolMember Method (IComplexCornerTreatmentFeatureData)

Sets the trim tool member for this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Function SetTrimToolMember(  
    ByVal Member As System.Object _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim Member As System.Object  
Dim value As System.Boolean  
  
value = instance.SetTrimToolMember(Member)
```

C#

```
System.bool SetTrimToolMember(  
    System.object Member  
)
```

C++/CLI

```
System.bool SetTrimToolMember(  
& System.Object^ Member  
)
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Parameters

Member
[ICornerMember](#) or [IFeature](#)

Return Value

True if trim tool member successfully set, false if not

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::SetTrimToolMember](#).

Example

See the [ICornerManagementFolder](#) examples.

UserDefinedTrimFaces Property (IComplexCornerTreatmentFeatureData)

[See Also](#)

[SolidWorks.Interop.sldworks Namespace](#) > [IComplexCornerTreatmentFeatureData Interface](#) : UserDefinedTrimFaces Property (IComplexCornerTreatmentFeatureData)

Gets and sets the user-defined trim faces for this complex corner treatment feature.

.NET Syntax

Visual Basic (Declaration)

```
Property UserDefinedTrimFaces As System.Object
```

Visual Basic (Usage)

```
Dim instance As IComplexCornerTreatmentFeatureData  
Dim value As System.Object
```

```
instance.UserDefinedTrimFaces = value
```

```
value = instance.UserDefinedTrimFaces
```

C#

```
System.Object UserDefinedTrimFaces {get; set;}
```

C++/CLI

```
property System.Object^ UserDefinedTrimFaces {  
    System.Object^ get();  
    void set ( & System.Object^ value);  
}
```

NOTE: See [Differences Between Unmanaged C++ and C++/CLI Code](#).

Property Value

Array of [IFace2](#)

Visual Basic for Applications (VBA) Syntax

See [ComplexCornerTreatmentFeatureData::UserDefinedTrimFaces](#).

Example

See the [ICornerManagementFolder](#) examples.

Remarks

This property is valid only if [IComplexCornerTreatmentFeatureData::PlanarTrimToolType](#) is set to [swCornerTreatmentPlanarTrimToolType_e](#). CornerTreatmentPlanarTrimTool_UserDefined.
