

SOLIDWORKS Inspection Add-in API (.NET) — Reference (5/7): InspectionAddinMgr- InspectionProject

SOLIDWORKS API Documentation (converted from CHM)

InspectionAddinMgr (Type)

InspectionAddinMgr Interface

[See Also](#) [Members](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) : InspectionAddinMgr Interface

.NET Syntax

Visual Basic (Declaration)

```
Public Interface InspectionAddinMgr
    Inherits IInspectionAddinMgr
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr
```

C#

```
public interface InspectionAddinMgr : IInspectionAddinMgr
```

C++/CLI

```
public interface class InspectionAddinMgr : public IInspectionAddinMgr
```

See Also

[InspectionAddinMgr Members](#)
[SolidWorks.Interop.swinspectionAddIn Namespace](#)

InspectionAddinMgr Interface Methods

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) : InspectionAddinMgr Interface

For a list of all members of this type, see [InspectionAddinMgr members](#).

See Also

[InspectionAddinMgr Interface](#)
[SolidWorks.Interop.swinspectionAddIn Namespace](#)

InspectionAddinMgr Interface Members

[See Also](#) [Methods](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) : InspectionAddinMgr Interface

The following tables list the members exposed by [InspectionAddinMgr](#).

See Also

[InspectionAddinMgr Interface](#)

AddCharacteristics Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) > [InspectionAddinMgr Interface](#) : AddCharacteristics Method (InspectionAddinMgr)

Adds characteristics for the specified annotations.

.NET Syntax

Visual Basic (Declaration)

```
Function AddCharacteristics( _  
    ByRef AnnotationsIn As System.Object _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim AnnotationsIn As System.Object  
Dim value As System.Object  
  
value = instance.AddCharacteristics(AnnotationsIn)
```

C#

```
System.object AddCharacteristics(  
    ref System.object AnnotationsIn  
)
```

C++/CLI

```
System.Object^ AddCharacteristics(  
& System.Object^% AnnotationsIn  
)
```

Parameters

AnnotationsIn
Array of annotations

Return Value

[ICharacteristicsData](#)

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

Remarks

This method is valid only if [InspectionProjectData::Extraction](#) is set to [swiCharacteristicInfoExtraction_e.swiExtraction_Manual](#).

AddInspectionMethod Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : AddInspectionMethod Method (InspectionAddinMgr)

Adds the specified inspection method to the list of inspection methods.

.NET Syntax

Visual Basic (Declaration)

```
Function AddInspectionMethod(  
    ByVal MethodName As System.String _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr
Dim MethodName As System.String
Dim value As System.Boolean

value = instance.AddInspectionMethod(MethodName)
```

C#

```
System.bool AddInspectionMethod(
    System.string MethodName
)
```

C++/CLI

```
System.bool AddInspectionMethod(
    & System.String^ MethodName
)
```

Parameters

MethodName
Name of inspection method

Return Value

True if inspection method successfully added, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

AddOperation Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : AddOperation Method (InspectionAddinMgr)

Adds the specified operation to the list of operations.

.NET Syntax

Visual Basic (Declaration)

```
Function AddOperation( _
    ByVal Operation As System.String _
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr
Dim Operation As System.String
Dim value As System.Boolean

value = instance.AddOperation(Operation)
```

C#

```
System.bool AddOperation(  
    System.string Operation  
)
```

C++/CLI

```
System.bool AddOperation(  
& System.String^ Operation  
)
```

Parameters

Operation
Name of operation

Return Value

True if operation successfully added, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

See Also

AddOrEditBalloons Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : AddOrEditBalloons Method (InspectionAddinMgr)

Specifies settings for adding or modifying balloons in a drawing.

.NET Syntax

Visual Basic (Declaration)

```
Function AddOrEditBalloons( _  
    ByVal BalloonSettings As System.Object _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim BalloonSettings As System.Object  
Dim value As System.Boolean
```

```
value = instance.AddOrEditBalloons(BalloonSettings)
```

C#

```
System.bool AddOrEditBalloons(  
    System.object BalloonSettings  
)
```

C++/CLI

```
System.bool AddOrEditBalloons(  
& System.Object^ BalloonSettings  
)
```

Parameters

[BalloonSettings](#)
[IBalloonSettings](#)

Return Value

True if balloon settings successfully applied, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

Remarks

This method is valid only:

- for ballooned drawings.
- when `InspectionProjectData::Extraction` is set to [swiCharacteristicInfoExtraction_e.swiExtraction_Manual](#).

AddVendor Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : AddVendor Method (InspectionAddinMgr)

Adds the specified vendor to the list of vendors.

.NET Syntax

Visual Basic (Declaration)

```
Function AddVendor( _  
    ByVal VendorName As System.String, _  
    ByVal VendorType As System.Integer _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim VendorName As System.String  
Dim VendorType As System.Integer  
Dim value As System.Boolean
```

```
value = instance.AddVendor(VendorName, VendorType)
```

C#

```
System.bool AddVendor(  
    System.string VendorName,  
    System.int VendorType  
)
```

C++/CLI

```
System.bool AddVendor(  
& System.String^ VendorName,  
& System.int VendorType  
)
```

Parameters

VendorName
Name of vendor

VendorType
Type of vendor as defined by [swiVendorsInspectionType_e](#)

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

See Also

CreateInspectionProject Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : CreateInspectionProject Method (InspectionAddinMgr)

Creates an inspection project using the specified template and project data and balloons the model.

.NET Syntax

Visual Basic (Declaration)

```
Function CreateInspectionProject(  
    ByVal InspectionProjectData As System.Object, _  
    ByVal DeleteOld As System.Boolean, _  
    ByRef ErrorCode As System.Integer _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim InspectionProjectData As System.Object  
Dim DeleteOld As System.Boolean  
Dim ErrorCode As System.Integer  
Dim value As System.Object  
  
value = instance.CreateInspectionProject(InspectionProjectData, DeleteOld, ErrorCode)
```

C#

```
System.object CreateInspectionProject(  
    System.object InspectionProjectData,  
    System.bool DeleteOld,  
    out System.int ErrorCode  
)
```

C++/CLI

```
System.Object^ CreateInspectionProject(  
& System.Object^ InspectionProjectData,  
& System.bool DeleteOld,  
& [Out] System.int ErrorCode  
)
```

Parameters

InspectionProjectData
[InspectionProjectData](#)

DeleteOld
True to delete the existing project and create a new one, false to get the existing project

ErrorCode
Error code as defined by [swiErrorCode_e](#)

Return Value

[IInspectionProject](#)

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

See Also

CreateInspectionProjectData Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : CreateInspectionProjectData Method (InspectionAddinMgr)

Creates inspection project data.

.NET Syntax

Visual Basic (Declaration)

```
Function CreateInspectionProjectData( _  
    ByVal TemplatePathIn As System.String _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim TemplatePathIn As System.String  
Dim value As System.Object  
  
value = instance.CreateInspectionProjectData(TemplatePathIn)
```

C#

```
System.object CreateInspectionProjectData(  
    System.string TemplatePathIn  
)
```

C++/CLI

```
System.Object^ CreateInspectionProjectData(  
& System.String^ TemplatePathIn  
)
```

Parameters

TemplatePathIn
Full path name of inspection project template (see **Remarks**)

Return Value

[IInspectionProjectData](#)

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

Remarks

The templates are installed in c:\ProgramData\SOLIDWORKS\SOLIDWORKS Inspection 2022 Addin\Templates.

DeleteInspectionMethods Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : DeleteInspectionMethods Method (InspectionAddinMgr)

Deletes the specified inspection methods.

.NET Syntax

Visual Basic (Declaration)

```
Function DeleteInspectionMethods( _  
    ByRef MethodList As System.Object _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim MethodList As System.Object  
Dim value As System.Object  
  
value = instance.DeleteInspectionMethods(MethodList)
```

C#

```
System.object DeleteInspectionMethods(  
    ref System.object MethodList  
)
```

C++/CLI

```
System.Object^ DeleteInspectionMethods(  
& System.Object^% MethodList  
)
```

Parameters

MethodList
Array of inspection methods to delete

Return Value

Array of booleans indicating whether each inspection method is successfully deleted

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

See Also

DeleteOperations Method (InspectionAddinMgr)

[See Also](#)

Deletes the specified operations.

.NET Syntax

Visual Basic (Declaration)

```
Function DeleteOperations( _  
    ByRef OperationList As System.Object _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddInMgr  
Dim OperationList As System.Object  
Dim value As System.Object  
  
value = instance.DeleteOperations(OperationList)
```

C#

```
System.object DeleteOperations(  
    ref System.object OperationList  
)
```

C++/CLI

```
System.Object^ DeleteOperations(  
& System.Object^% OperationList  
)
```

Parameters

OperationList
Array of operations to delete

Return Value

Array of booleans indicating whether each operation is successfully deleted

Visual Basic for Applications (VBA) Syntax

See [InspectionAddInMgr](#) methods.

DeleteVendors Method (InspectionAddInMgr)

[See Also](#)

Deletes the specified vendors.

.NET Syntax

Visual Basic (Declaration)

```
Function DeleteVendors( _  
    ByRef VendorList As System.Object _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim VendorList As System.Object  
Dim value As System.Object  
  
value = instance.DeleteVendors(VendorList)
```

C#

```
System.object DeleteVendors(  
    ref System.object VendorList  
)
```

C++/CLI

```
System.Object^ DeleteVendors(  
    & System.Object^% VendorList  
)
```

Parameters

VendorList
Array of vendors to delete

Return Value

Array of booleans indicating whether each vendor is successfully deleted

EditInspectionMethod Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : EditInspectionMethod Method (InspectionAddinMgr)

Edits the specified inspection method.

.NET Syntax

Visual Basic (Declaration)

```
Function EditInspectionMethod( _  
    ByVal MethodID As System.String, _  
    ByVal MethodName As System.String _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim MethodID As System.String  
Dim MethodName As System.String  
Dim value As System.Boolean  
  
value = instance.EditInspectionMethod(MethodID, MethodName)
```

C#

```
System.bool EditInspectionMethod(  
    System.string MethodID,  
    System.string MethodName  
)
```

C++/CLI

```
System.bool EditInspectionMethod(  
& System.String^ MethodID,  
& System.String^ MethodName  
)
```

Parameters

MethodID
ID of inspection method
MethodName
Name of inspection method

Return Value

True if inspection method successfully modified, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionAddinMgr](#) methods.

EditInspectionProject Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : EditInspectionProject Method (InspectionAddinMgr)

Edits the inspection project and re-balloons the model.

.NET Syntax

Visual Basic (Declaration)

```
Function EditInspectionProject(  
    ByVal InspectionProjectData As System.Object _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim InspectionProjectData As System.Object  
Dim value As System.Boolean
```

```
value = instance.EditInspectionProject(InspectionProjectData)
```

C#

```
System.bool EditInspectionProject(  
    System.object InspectionProjectData  
)
```

C++/CLI

```
System.bool EditInspectionProject(  
& System.Object^ InspectionProjectData  
)
```

Parameters

[InspectionProjectData](#)
[InspectionProjectData](#)

Return Value

True if inspection project successfully modified, false if not

GetBalloonSettings Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : GetBalloonSettings Method (InspectionAddinMgr)

Gets a balloon settings object.

.NET Syntax

Visual Basic (Declaration)

```
Function GetBalloonSettings() As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim value As System.Object  
  
value = instance.GetBalloonSettings()
```

C#

```
System.object GetBalloonSettings()
```

C++/CLI

```
System.Object^ GetBalloonSettings();
```

Return Value

GetCharacteristicIDs Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : GetCharacteristicIDs Method (InspectionAddinMgr)

Gets the characteristic IDs.

.NET Syntax

Visual Basic (Declaration)

```
Function GetCharacteristicIDs() As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr  
Dim value As System.Object  
  
value = instance.GetCharacteristicIDs()
```

C#

```
System.Object GetCharacteristicIDs()
```

C++/CLI

```
System.Object^ GetCharacteristicIDs();
```

Return Value

Array of characteristic IDs

GetCharacteristicsData Method (InspectionAddinMgr)

[See Also](#)

[SolidWorks.Interop.swinspectionAddin Namespace](#) > [InspectionAddinMgr Interface](#) : GetCharacteristicsData Method (InspectionAddinMgr)

Gets the specified characteristic data.

.NET Syntax

Visual Basic (Declaration)

```
Function GetCharacteristicsData( _  
    ByVal CharId As System.Double _  
) As System.Object
```

Visual Basic (Usage)

```
Dim instance As InspectionAddinMgr
Dim CharId As System.Double
Dim value As System.Object

value = instance.GetCharacteristicsData(CharId)
```

C#

```
System.Object GetCharacteristicsData(
    System.double CharId
)
```

C++/CLI

```
System.Object^ GetCharacteristicsData(
    & System.double CharId
)
```

Parameters

CharId
ID of characteristic to retrieve

Return Value

ExportTo2DPDF Method (InspectionProject)

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) > [InspectionProject Interface](#) : ExportTo2DPDF Method (InspectionProject)

Exports the inspection report in 2D PDF format.

.NET Syntax

Visual Basic (Declaration)

```
Function ExportTo2DPDF( _  
    ByVal FilePath As System.String _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionProject  
Dim FilePath As System.String  
Dim value As System.Boolean  
  
value = instance.ExportTo2DPDF(FilePath)
```

C#

```
System.bool ExportTo2DPDF(  
    System.string FilePath  
)
```

C++/CLI

```
System.bool ExportTo2DPDF(  
& System.String^ FilePath  
)
```

Parameters

FilePath
Full path name of the PDF to export

Return Value

True if export is successful, false if not

ExportTo3DPDF Method (InspectionProject)

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) > [InspectionProject Interface](#) : ExportTo3DPDF Method (InspectionProject)

Exports the inspection report in 3D PDF format.

.NET Syntax

Visual Basic (Declaration)

```
Function ExportTo3DPDF( _  
    ByVal FilePath As System.String _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionProject  
Dim FilePath As System.String  
Dim value As System.Boolean
```

```
value = instance.ExportTo3DPDF(FilePath)
```

C#

```
System.bool ExportTo3DPDF(  
    System.string FilePath  
)
```

C++/CLI

```
System.bool ExportTo3DPDF(  
& System.String^ FilePath  
)
```

Parameters

FilePath

Full path name of the PDF to export

Return Value

True if export is successful, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionProject](#) methods.

Remarks

This method is valid only for parts.

ExportToEDrawings Method (InspectionProject)

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) > [InspectionProject Interface](#) : ExportToEDrawings Method (InspectionProject)

Exports the inspection report to eDrawings.

.NET Syntax

Visual Basic (Declaration)

```
Function ExportToEDrawings( _  
    ByVal FilePath As System.String _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionProject  
Dim FilePath As System.String  
Dim value As System.Boolean
```

```
value = instance.ExportToEDrawings(FilePath)
```

C#

```
System.bool ExportToEDrawings(  
    System.string FilePath
```

```
)
```

C++/CLI

```
System.bool ExportToEDrawings(  
& System.String^ FilePath  
)
```

Parameters

FilePath

Full path name of the eDrawings file to export

Return Value

True if export is successful, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionProject](#) methods.

ExportToExcel Method (InspectionProject)

[See Also](#)

[SolidWorks.Interop.swinspectionAddIn Namespace](#) > [InspectionProject Interface](#) : ExportToExcel Method (InspectionProject)

Exports the inspection report to Microsoft Excel.

.NET Syntax

Visual Basic (Declaration)

```
Function ExportToExcel( _  
    ByVal TemplatePath As System.String, _  
    ByVal FilePath As System.String, _  
    ByVal Multisheet As System.Boolean _  
) As System.Boolean
```

Visual Basic (Usage)

```
Dim instance As InspectionProject  
Dim TemplatePath As System.String  
Dim FilePath As System.String  
Dim Multisheet As System.Boolean  
Dim value As System.Boolean
```

```
value = instance.ExportToExcel(TemplatePath, FilePath, Multisheet)
```

C#

```
System.bool ExportToExcel(  
    System.string TemplatePath,  
    System.string FilePath,  
    System.bool Multisheet  
)
```

C++/CLI

```
System.bool ExportToExcel(  
& System.String^ TemplatePath,
```

```
& System.String^ FilePath,  
& System.bool Multisheet  
)
```

Parameters

TemplatePath

Full path name of the inspection report template to use (see **Remarks**)

FilePath

Full path name of the Microsoft Excel file to export

Multisheet

True if multisheet, false if not

Return Value

True if export is successful, false if not

Visual Basic for Applications (VBA) Syntax

See [InspectionProject](#) methods.

Remarks

The templates are installed in **c:\ProgramData\SOLIDWORKS\SOLIDWORKS Inspection 2022 Addin\Templates**.
